

RAHUL ROSHAN

PROFESSIONAL SUMMARY

Principal Architect | Enterprise Platforms, Intelligent Automation & Digital Transformation

Senior Technology Leader & Enterprise Architect with deep expertise in workflow-led digital transformation, AI decisioning, and large-scale integration strategies. Proven in leading complex, multi-vendor platforms across BFSI sector and regulated environments, driving cloud-native adoption, DevOps enablement, and AI-driven automation at enterprise scale. TOGAF 9, CLSA, and AI certified, with strong governance, operating model, and stakeholder leadership capabilities. Passionate about translating emerging technologies—including AI, data platforms, and cloud services—into measurable business outcomes, cost optimization, and improved customer experiences.

WORK HISTORY

Consultant, 05/2018 - Current

Tata Consultancy Services (TCS), London

Lloyds Bank – Commercial Banking Applications (Jan 2022 – Present)

- Accountable for a multi-year programme, leading **50+** architects and engineers across onshore and offshore teams, with responsibility for delivery risk, commercial outcomes, and stakeholder confidence.
- Owned enterprise Pega and AI-led transformation portfolio across Commercial Banking, accountable for outcomes, risk, and delivery across multiple concurrent programmes.
- Accountable for platform strategy and roadmap covering workflow automation, decisioning (Pega CDH), AI enablement, and enterprise integration.
- Led GenAI adoption at bank level, sponsoring the Pega GenAI Pathfinder programme and enabling multiple business domains to identify, prioritise, and fund AI use cases.
- Directed solution strategy for major change initiatives, investment cases, and executive-level proposals, influencing funding decisions and delivery priorities.
- Accountable for enterprise integration strategy (API and event-driven platforms), setting security, resilience, and performance standards adopted across the bank.
- Established DevOps and CI/CD operating model at scale, improving time-to-market and delivery predictability across multiple delivery partners.
- Built and led architecture and engineering capability, managing and mentoring Lead Architects, LSAs, and delivery leads across onshore and offshore teams.
- Acted as senior stakeholder interface across Business, Technology, Risk, and Compliance, ensuring regulatory alignment while driving measurable efficiency and customer outcomes.

SKILLS

Core Leadership & Architecture

- Enterprise Architecture & Target Operating Models (TOGAF)
- Platform & Solution Architecture
- Digital Transformation & Modernization
- Stakeholder & Executive Management

Intelligent Automation & Decisioning

- Pega Platform Architecture (Workflow, Case Management)
- Intelligent Automation & AI-led Decisioning
- Customer / Credit Decisioning, Next Best Action (NBA)
- Predictive & Adaptive Analytics, Model Governance

Data, AI & Emerging Technologies

- Machine Learning, Intelligent Virtual Assistants (IVA), NLP
- Generative AI enablement and use-case adoption
- Data-driven decisioning and analytics platforms
- Enterprise AI Generalist

Integration, Cloud & Engineering

- Enterprise Integration (API, Event-Driven, Kafka, DX API)
- Cloud-native Architecture & DevOps (CI/CD, Deployment Manager)
- Performance, Resilience & Scalability Engineering

Governance, Security & Delivery

- Security, Risk & Regulatory Compliance (BFSI)
- Delivery Governance & Operating Models
- Agile & Scaled Agile Delivery (Scrum)

Lloyds Bank – Commercial Lending (Jun 2025 – Present))

- Accountable for the architecture and strategic direction of CC360 Lending Transformation programme, defining a long-term 2030 North Star Vision to unlock **5%** market-share growth and **£1bn** revenue uplift through broker channel digitisation and intelligent decisioning.
- Introduced automated credit decisioning for SME and commercial lending, enabling up to **80%** straight-through processing and sub-24-hour decisions, improving risk control while accelerating revenue realisation.
- Implemented a group-wide Single View of Facilities capability, removing data fragmentation across core systems for lending entities, accelerating relationship-manager decision-making, removing swivel chair and improving revenue conversion.

Lloyds Bank – CLM OKYC (Oct 2022 – Feb 2025)

- Owned CLM and KYC platform capability across onboarding and due-diligence journeys, accountable for regulatory compliance, operational resilience, and business outcomes.
- Accountable for AML, KYC, and due-diligence operating models, ensuring alignment with regulatory expectations and internal risk appetite.
- Directed enterprise integration, DevOps, and automation strategy supporting end-to-end onboarding & offboarding workflows, improving scalability and control across the lifecycle.
- Provided executive oversight of case management, rules, and workflow standards, ensuring consistent delivery quality across multiple teams and delivery partners.

Lloyds Bank – CB Pega Transformation (Jan 2020 – Sep 2022)

- Owned and delivered a **£4m** enterprise platform modernisation programme, upgrading Pega from v7 to v8, including cloud migration and transition to microservices-based integration.
- Accountable for business continuity and risk management during large-scale transformation, overseeing the migration of **7M+** live case records with near-zero downtime.
- Led optimisation of **200+** end-to-end business processes, driving platform standardisation, performance improvements, and operational resilience.
- Directed multi-vendor delivery teams across architecture, engineering, and operations, ensuring controlled execution across a high-risk change programme.
- Programme recognised with a **2023 Digital Transformation Industry Award**, reflecting measurable business impact and delivery excellence.

Lloyds Bank – RHEL Upgrade (May 2018 – Dec 2020)

- Owned and delivered a large-scale Pega upgrade portfolio covering **35** enterprise applications and **15** technical platforms, accountable for business continuity, delivery risk, and stakeholder confidence.
- Directed upgrade strategy, sequencing, and governance to ensure near-zero disruption across critical business services while meeting regulatory and operational requirements.

Technical Lead, 04/2017 - 05/2018

Incessant Technologies, Hyderabad, India

- Led internal Pega PoC including GDPR compliance, Blockchain, and Amazon Lex integration, as well as client projects (FE Credit) in the lending domain.

CERTIFICATIONS

- TOGAF 9 Certified- The Open Group
- Building with the Claude API
- Microsoft Azure Fundamental
- Microsoft Azure AI Fundamental
- Generative AI Fundamentals-Databricks
- AI for Everyone-Deep Learning
- Prompt Design in Vertex- Google
- NSE Certificate in Financial Markets: Beginner's Module
- NSE Certificate in Mutual Fund: Beginner's Module
- AINS -21 certification

Pega

- Certified Lead System Architect (**CLSA**)
- Certified Senior System Architect (**CSSA**)
- Certified System Architect (**CSA**)
- Certified Pega Marketing Consultant (**CPMC**)
- Certified User Interface Specialist (**CUIS**)

NATIONALITY

British

EDUCATION

Bachelor of Engineering
VTU University

12th, CBSE
Holy Cross School

10th, CBSE
Holy Cross School

- Managed end-to-end project activities: requirement gathering, architecture design, delivery, and stakeholder presentations.
- Integrated emerging technologies into existing systems, ensuring solutions remained competitive and aligned with industry trends.

Pega Lead and Team Lead, 01/2015 - 03/2017

Accenture, Bangalore, India

- Led enterprise-scale Pega implementations and upgrades across telecom, banking, insurance, and healthcare, delivering complex programmes on Pega 5.x–7.x.
- Designed Pega decisioning frameworks and Next-Best-Action (NBA) strategies, improving customer engagement and business outcomes.
- Served as Pega Lead/Team Lead for global clients (Etisalat, AIG, TD Bank, Highmark), managing large teams, cross-functional stakeholders, and end-to-end delivery.

Delivery Module Lead, 04/2010 - 01/2015

Mphasis, Bangalore, India

- Led end-to-end delivery for AIG Pega platforms, providing technical leadership, delivery governance, and quality assurance across multiple workstreams.
- Owned platform architecture, standards, and lifecycle management, ensuring compliance, stability, and effective BAU operations.
- Managed and mentored delivery teams, delegating work, reviewing outputs, and driving consistent performance and client satisfaction.

Software Engineer, 08/2007 - 03/2010

Accenture, Bangalore, India

- Held Pega Dev roles for client J.P. Morgan.
- Design and Development of Pega applications
- Conducted rigorous testing, ensuring minimal bugs at the development stage.
